

REMARKS

According to 37 C.F.R. § 1.821(a):

“amino acid sequences as used in §§ 1.821 through 1.825 are interpreted to mean an unbranched sequence of four or more amino acids...”

(emphasis added).

Upon review of the specification and of prior responses, applicants realize that they have inadvertently labeled sequences which do not satisfy the above rule, and correct this error in this response.

For example, at page 2, paragraph [0019], Ser⁸⁷Asn⁸⁸Gly⁸⁹Thr⁹⁰ clearly constitutes four amino acids, i.e., amino acids 87-90 whereas Ser⁸⁷Asn⁸⁸Thr⁹⁰Thr⁹² and Ser⁸⁷Asn⁸⁸Thr⁹⁰Ala¹⁶², which were labeled as SEQ ID NOS: 3 and 4 do not. The second series describes a mutation of 3 amino acids in a row, and one that is 71 amino acids away, whereas the first omits amino acid 91, thus disrupting the “rule of four.”

Applicants regret any confusion caused by this mistake, and now submit the following corrective amendments. It is believed that no new matter is presented.

Entry of the foregoing amendment is requested.
